**Paul R. Secord : Bandelier National Monument (Images of America)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Bandelier National Monument (Images of America):

1 of 1 people found the following review helpful. Photographs, sketches and historical information combine for a well written book...By SavurbksSUMMARY: Through many black and white images, photographs and sketches, author Paul Secord presents the history, archeology and anthropology of Bandelier National Monument. Found just outside Santa Fe, New Mexico, the history of the area and people are explained and linked to the present day ruins. With precious ancestral preservation, named for anthropologist Adolph Bandelier, Bandelier National Monument received

national recognition in 1916. Depicting the social environments of Native Americans, the book also shares pictures of the cave dwellings, area topography, tourist experiences and visitors. Part of the Images of America series which celebrates history across the country, this latest addition truly educates and inspires. A PENNY FOR MY THOUGHTS: Having visited, experienced and researched Bandelier National Monument, I was thrilled to see this newest book in the series. Loaded with interesting, relevant and unique history, tidbits, pictures and people, I devoured this book cover to cover. Perfect for anyone visiting the area, a school library or a history buff, Bandelier National Monument was outstanding. Planning on keeping this book for my own collection yet also sharing with family, I also hope to discover other books by this author. **RATING: 5 (out of 5) pennies\***I received a complimentary copy of Bandelier National Monument from The History Press for my honest review. 0 of 0 people found the following review helpful. I would recommend this book to everyone. By gbronitsky I have been to Bandelier National Monument several times but this book really enlightened me about the history and biology of the park. The section, Top Secret Visitors, was totally new to me. I would recommend this book to everyone, even if you have visited the Monument before, even if you think you know the Monument. A fascinating study!

Bandelier National Monument is located about 60 miles west of Santa Fe, New Mexico, on the edge of the Valles Caldera, the center of a massive extinct volcano that forms the Jemez Mountains. The 50-plus-square-mile preserve was designated a national monument in 1916 and is named for anthropologist Adolph Bandelier, the first Euro-American to describe the area and encourage its preservation. Within its boundaries are some of the most important archaeological resources and the most striking scenery in the American Southwest. With deep canyons cutting through volcanic ash, the dramatic geology of the area alone would warrant national attention. However, this is also a place that shows evidence of nearly continuous human occupation for more than 10,000 years and still retains direct links between prehistoric and living Native Americans.
