From Library JournalScrutinize this altas very carefully before purchasing. It contains 55 main maps, many of the double-page variety, produced by reputable German cartographers. The maps are clearly drawn and admirably readable. Scales range from 1:100,000,000 to 1:250,000, with 1:15,000,000 most prevalent; eight maps covering the United States are scaled at 1:4,160,000. Some simple text and pretty pictures scattered throughout add little to the atlas's informational value. The book concludes with an index of 53,000 place-names. Why the extra caution? All maps in the atlas have been published previously in The Great World Atlas ( LJ 12/86), a larger and much superior work. Most libraries can safely pass on this "new" atlas.- Kenneth F.
