By ImmenseSong My Colombian and Uruguayan friends have asked how I learned Spanish so well; This is the book I tell them about. They don't need it of course, but it's the truth. This copy is to replace the first copy I bought which is completely worn out. I constantly referenced this book for it's perfect layout for a beginner. These types of books are not miracle workers. You get out of it what you put into it. In other words; you have to do the work. I still have trouble with conjugating verbs and masculine or feminine forms but I am understood by Spanish speakers. I don't believe this is in print any longer. That's a shame. 0 of 0 people found the following review helpful. Great for learning Spanish! By Love2Shop I bought this book for my husband and he loves it! 4 of 5 people found the following review helpful. Spanish Course Book By Andrew Dodson I bought this book to help with my Spanish classes in school, and now that I'm using it, I have really benefited from it. It teaches conjugation and phrases which are extremely helpful. I'd recommend this to anyone interested in learning the language.
