ITMB Canada : Belize 1:250,000 Travel Map 2005* (International Travel Country Maps: Belize)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Belize 1:250,000 Travel Map 2005*** (International Travel Country Maps: Belize):

This is a very detailed, double-sided map of Central America's only English-speaking country at the scale of 1:250,000. All parts of the country are very well shown, so this map is useful for beach life, snorkeling, archaeological sightseeing or driving in the interior; inset of Belize City and place name index are included.
