R. Bulkeley : Bellingshausen and the Russian Antarctic Expedition, 1819-21 before purchasing it in order to gage whether or not it would be worth my time, and all praised Bellingshausen and the Russian Antarctic Expedition, 1819-21:

1 of 1 people found the following review helpful. Worth the price if you have an interest in filling a gap in the history

of Antarctic exploration. By David Baker This much needed chronicle of the Bellinshasen expedition helps to fill the gaps. In providing some heretofore details about the man and the events, it gave more context to this remarkable and relatively unknown expedition. The author would have benefited from an editor would have enhanced its readability. Considering the price, it cannot be compared favorably to some of the classic accounts of Scott, Shackleton, Mawson et al.

This book examines the little studied story of Bellinghausen, and includes the fullest biography of the celebrated Russian explorer ever published, and with thoughtful discussion of the achievements and limitations of the expedition and suggestions for further research.

'An extensive compilation of annotated correspondence and reports ... which sheds new light on the first Russian expedition to Antarctica. ... Bulkeley adds his profound background knowledge, which allows the reader to dip into everyday life, scientific knowledge and the political circumstances in Russia 200 years ago.' - Cornelia Ldecke, Convenor, SCAR History Experts Group 'An invaluable sourcebook and an exceptional contribution that substantially readjusts the historical record. ... We are given a brief informative overview hitherto unparalleled in scope and depth of the man's life and times. ... It is a pleasure to follow the author in this exciting piece of intellectual detective work.' - Aant Elzinga, Professor emeritus, University of Gothenburg, Sweden 'An amazing achievement.' - Ian R. Stone, Editor, Polar Record About the Author Rip Bulkeley lives in Oxford, UK, and has written studies of the arms race, the space race, and international scientific cooperation.
